

SEEN SAFETY

The SEEN Safety System transforms your existing high-visibility workwear into part of an active detection system.

**SIMPLE
EFFECTIVE
AFFORDABLE**

IRIS 860 sensors make pedestrian detection easy by detecting retro-reflective tape in the workplace. If the sensor detects a pedestrian or marked object in its critical risk zone, there will be a loud audible alert. The IRIS-i Camera together with SEEN's secure online data platform, provide crucial evidence behind every sensor detection, allowing you to make informed, proactive safety decisions.

**Active detection
of retro-reflective
material**

**No irrelevant
detections**

**Reliable detection
indoor/outdoor**

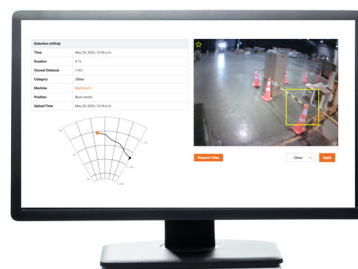

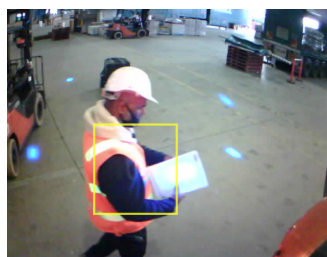

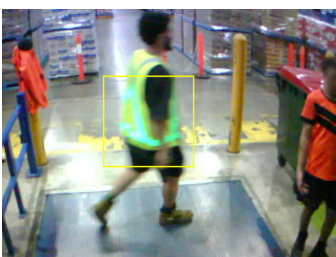

**Online Detection
Data**

**Easy to install
on any machine**

**Low cost
of ownership**
