

What is Impact Warning?

Transmon's standalone iTech Impact Warning device enhances site safety and operator accountability by raising awareness of an excessive impact.

The 3-axis sensor is positioned on the vehicle's main chassis to monitor adverse acceleration/deceleration events, events above the programmed thresholds are logged. Output signals from the unit can be used to activate visual and acoustic warnings. Reset protection is incorporated whereby only authorised managers can deactivate the alerts.

What's included:

- Impact sensor
- Diagnostic software
- Installation instructions
- Manager's alarm reset key switch
- 12-24Vdc, 100dB alarm light combo

Features:

- Voltage range: 8-60Vdc
- Management Reset Key
- Two configurable outputs
- Robust design, easy to install
- Environment protection: IP67, -10°C to +80°C
- 3-axis sensing with independent settings for X, Y, Z
- Programmable G-force and Duration-time thresholds
- Compatible with ICE and Battery powered forklifts and vehicles
- Optional post incident Creep Speed (Transmon Speed Limiter or direct to truck connection)

Benefits to you:

- Increased site safety
- Reduced damage costs
- Low cost, easy to install solution
